OVERVIEW

Professor of Statistics and Econometrics whose research develops shrinkage, pretest and penalized estimation methods for high-dimensional, spatial and functional data. Current work focuses on statistical machine learning, functional data analysis, elastic shape analysis, reproducible R/C++ software, and applied data science problems in economics, biostatistics and social sciences.

Research areas: Machine learning; spatial statistics; functional data analysis; elastic shape analysis; shrinkage and penalized estimation; statistical inference; high-dimensional data; big data analytics.

Bibliometric snapshot: 94 publications; 35 WoS-indexed publications; 31 Scopus-indexed publications; 213 WoS citations; WoS h-index 10; 440 Scopus citations; Scopus h-index 14. Source: AVESİS, accessed September 25, 2026.

SKILLS

Professional programming in R and Python; R package development with C++/RcppArmadillo; reproducible statistical computing; SPSS-based statistical analysis; machine learning workflows; simulation studies; applied econometric and biomedical data analysis.

BRIEF RESEARCH STATEMENT

My research focuses on improving parameter estimation and predictive modelling in complex data settings. With my co-authors, I have developed and studied shrinkage, pretest and penalized estimation strategies for linear, partially linear, quantile and high-dimensional regression models. Recent work extends these ideas to robust estimation, spatial data analysis, functional data analysis and statistical machine learning.

These problems arise in computer science, social sciences, biometrics, finance, network security, social media analysis and industrial applications. They create both opportunities and methodological challenges, including noise accumulation, spurious correlations, heavy computational cost and algorithmic instability. My work addresses these challenges through theory, simulation, real-data analysis and reproducible implementation in R and C++.

I am especially interested in collaborative research that connects rigorous statistical methodology with substantive scientific questions.

APPOINTMENTS

Sessional Instructor Jan–May 2025
Simon Fraser University, Department of Statistics and Actuarial Science, Burnaby, Canada
- Applied Discrete Data Analysis STAT 475 / STAT 675

Visiting Professor July 2024–July 2025
Simon Fraser University, Department of Statistics and Actuarial Science, Burnaby, Canada
- Machine Learning for Functional Data with Prof. Jiguo Cao

Professor of Statistics 2023–present
İnönü University, Department of Econometrics, Malatya, Turkey

Visiting Associate Professor Feb–Aug 2019
The University of British Columbia, Department of Statistics, Vancouver, Canada
- Robust Penalized Estimation in Network Data with Prof. Ruben H. Zamar

Associate Professor of Statistics 2017–2023
İnönü University, Department of Econometrics, Malatya, Turkey

Visiting Assistant Professor 17 May–17 Aug 2016
Brock University, Department of Mathematics & Statistics, St. Catharines, Canada
- High–Dimensional Estimation Strategies with Prof. S. Ejaz Ahmed

Assistant Professor of Statistics 2015–2017
İnönü University, Department of Econometrics, Malatya, Turkey

Visiting International Scholar (PhD Research) 2013–2014
Brock University, Department of Mathematics & Statistics, St. Catharines, Canada
- Shrinkage and penalized estimation strategies with Prof. S. Ejaz Ahmed

Research Assistant 2009–2014
İnönü University, Department of Econometrics, Malatya, Turkey

EDUCATION

Associate Professorship Degree in Econometrics March/2024
Associate Professorship Degree in Statistics December/2017
PhD in Mathematics (In English) 2010–2014
İnönü University, Malatya, Turkey
"Penalty and non-penalty estimation strategies for linear and partially linear models"
Thesis advisors: Mehmet Güngör (İnönü University) & S. Ejaz Ahmed (Brock University)

MS in Mathematics (In Turkish) 2008–2010
Fırat University, Elazığ, Turkey
"Generalized Statistical Convergence"

BS in Mathematics 2004–2008
Fırat University, Elazığ, Turkey

SOFTWARE EXPERIENCE

1. **Yüzbaşı, B.** & Cao, J. (2026). `sglasso`: an R package for collinear groupwise selection via scaled group lasso, written with C++ and RcppArmadillo. Related article: Yüzbaşı & Cao (2026), "Collinear Groupwise Selection via Scaled Group Lasso," *The American Statistician*.
2. **Yüzbaşı, B.**, Arashi, M., & Akdeniz, F. (2019). `rbridge`: Restricted Bridge Estimation. R package version 1.0, written with C++ and RcppArmadillo. Related article: Yüzbaşı et al. (2021), Penalized regression via the restricted bridge estimator, *Soft Computing*, 25(13), 8401–8416.
3. Python programming for statistical computing, machine learning workflows, data cleaning and reproducible research pipelines.

4. SPSS programming and applied statistical analysis for social science and medical research; lecturer for applied SPSS courses.

PROJECTS, SCHOLARS, AWARDS AND GRANTS

- "Modeling Heterogeneity in Big Spatial Data with Explainable and Supervised Machine Learning", TÜBİTAK 1001, Project Number: 126K746. Principal Investigator. Funding approved August 7, 2026.
- "Validity and Reliability Analysis of an AI-Developed Turkish Tax Compliance Scale", Inonu University Scientific Research Project, SBA-2026-4833, April 1, 2026–April 1, 2027. Researcher. Ongoing.
- "Analysis of the Effects of Corruption Perception on Political Behaviour in Turkey", Inonu University Scientific Research Project, SBA-2026-4536, February 17, 2026–February 17, 2027. Researcher. Ongoing.
- "Scaled Shrinkage Strategy for Complex Data Structures", Inonu University Scientific Research Project, SBA-2025-4340, November 13, 2025–November 13, 2026. Principal Investigator. Ongoing.
- "Machine Learning for Functional Data", TÜBİTAK 2219 International Postdoctoral Research Scholarship. Host: Simon Fraser University, Department of Statistics and Actuarial Science, Canada, 2024–2025, 12 months. Role: Coordinator. Budget: 31,200 USD.
- "Investigation of Domestic and Foreign Migration of Van Province by Geographically Weighted Regression Method", TÜBİTAK 3005 Innovative Solutions Research Projects Support Program in Social Sciences and Humanities, Project Number: 122G128, 01.10.2022–01.11.2023. Role: Coordinator. Budget: 327,137 Turkish Liras.
- "Shrinkage and Penalized Estimation Strategies", TÜBİTAK 2214-A International Research Fellowship Programme for PhD Students. Host: Brock University, Department of Mathematics and Statistics, Canada, 2013–2014, 12 months. Role: Coordinator. Budget: 15,600 USD.
- "Robust Regularization and Gaussian Graphical Models", Inonu University International Research Project, SUA-2019-1629, January 22–December 20, 2019. Principal Investigator. Research visit: The University of British Columbia, Canada, February–August 2019. Budget: 7,500 USD. Completed.
- "Pretest and Stein-type Estimation in Linear Quantile Regression Models", Inonu University Scientific Research Project, SBA-2017-946, December 12, 2017–November 21, 2018. Principal Investigator. Completed.
- "Liu-type Estimation in Linear Regression Models", Necmettin Erbakan University Scientific Research Project, Project Number: 171215001, 03.2017–12.2017. Role: Researcher.
- The Fields Institute, University of Toronto, Toronto, Canada, 2016, congress attendance grant.

ADVISING THESIS

- Cetin Gorur, Gross domestic product estimation of Turkey with dynamic line models, Master Thesis, Inonu University, 2019.
- Emsal Cagla Avcu, An application on Lasso VAR and VARX models, Master Thesis, Inonu University, 2019.
- Ozlem Taya, Classification with support vector machines and logistic regression: Turkey's import and export example, Master Thesis,Inonu University, 2022
- Mustafa Pala, Ridge regression parameter selection: Turkey's foreign direct investment example, Master Thesis, Inonu University, 2022.
- Merve Karakas, Generalized Additive Models: An Application of Econometric Data, Master Thesis, Inonu University, 2024. Completed.
- Cetin Gorur, Investigation of Domestic and Foreign Migration of Van Province by Geographically Weighted Regression Method, PhD Thesis, Inonu University, 2024. Completed.

COURSE

- Applied SPSS analysis, İnönü University, Two months in 2012, As lecturer
- Applied SPSS analysis, İnönü University, Two months in 2024, As lecturer

MEMBERSHIP

- Elected Member of the International Statistical Institute (ISI), 2023–present.
- Member of the International Association for Statistical Computing (IASC), 2023–present.

WORKSHOPS

1. HDDA-VI: The Sixth International Workshop on the Perspectives on High-Dimensional Data Analysis, The Fields Institute, Toronto, May 2016. Role: Scientific and Organizing Committee.
2. Committee member of International Symposium on Big Data and Applied Statistics (ISBDAS), Guangzhou, China, November 2018.

TEACHING EXPERIENCE

I have taught undergraduate courses in experimental design, probability, categorical data analysis, mathematical statistics, regression analysis, linear algebra, numerical analysis, multivariate statistics, and introductory statistics. At the master's and PhD levels, I have taught statistical methods, machine learning and big data analytics.

From 2022–2026, I taught at least five courses per semester at İnönü University, including a course in English. I also taught Applied Discrete Data Analysis (STAT 475/675) at Simon Fraser University in spring 2025.
